Layer 5				4			3	4	4													
APPLICATION																						
	MOSO Solid panels consist of multiple layers of bamboo, where the middle layer can be either plain pressed or side pressed. These bamboo panels are especially interesting in those applications where the side of the panel remains visible, like steps of a staircase and kitchen work tops.										MOSO Thick Veneer and (sliced) Veneer is mainly used as a panel covering material, where the bamboo is pressed, double sided, on a base (for example MDF or chipboard). In this way a sandwich panel is created, to be used in furniture, wall cladding, ceilings, etc.					Tatamat-, Panda- und Zen- Tambour are decorative and modern claddings for walls, ceilings, etc.						

¹⁾ Only available in Side Pressed, ²⁾ Only available with strip size 2x17mm, ³⁾ Only available unfinished and in 30m Length (Zen 15m Length), ⁴⁾ Available in 15m and 30m Length, ⁵⁾ There are 9 different colours available: 01=White, 11=Black, 12=Elephant, 25=Mahogany, 65=Blossom, 40=Blue, 60=Taupe, 70=Colonial, 75=Chestnut.
